JACOB SLOJKOWSKI

FRONT END DEVELOPER

JacobSlojkowski.com | Jacob.Slojkowski@gmail.com

PROFILE

With a strong background in Web Development, Data Analysis, and Transport Management, I bring a diverse and robust skill set that includes management, strategic planning, and creative thinking. I thrive under high-pressure scenarios and possess practical expertise in Web Development using technologies like React and Next.js.

SKILLS

Javascript.   React.   Typescript.   Redux.   Next.js.   Tailwind.   Styled Components.   Framer Motion   Supabase.   Power BI.   Logistics Management.   Data Analysis.   Team leader and more

EMPLOYMENT SUMMARY

Lecturer in Statistics and Data Analysis, GEMS Qatar   07.2024 – 07.2025

• **D**elivering lectures on statistics and data analysis in the American educational system.
• **P**reparing students for midterm exams and helping them understand complex statistical topics such as regression, analysis of variance, and hypothesis testing.
• **E**xplaining complicated data analysis concepts in an accessible and understandable way, which contributed to the development of students' logical thinking, analytical approach, and problem-solving skills.
• **U**sing tools such as Excel, Python, and R for data analysis in teaching, which directly translated into practical skills in data analysis.

Developer and Data Analyst, PrettyEstimateLTD   06.2023 – 07.2025

• **C**reated and maintained web applications for a startup offering B2B services in automatic pricing.
• **U**sed technologies such as React, Next.js, Redux, and Tailwind to develop efficient and scalable solutions. Additionally, I analysed data and suggested changes based on the collected information.
• **S**uccessfully delivered high-quality projects that improved the startup's service offering and user experience, contributing to its growth and competitiveness in the market.

Data Analyst, pladis   06.2022 – 05.2024

• **I** was promoted to the position of Data Analyst, where I analysed raw data and used Power BI to deliver 'actionable' reports for various departments.
• **D**eveloped and implemented data-driven reports in Power BI and Excel, as well as strategies that significantly improved the company's KPI metrics, such as delivery time, reduction of 'empty' miles, better utilization of trailer space, and many others.
• **P**articipated in meetings where I reported on business performance and suggested improvements.
• **C**reated and managed an SQL database used for various reporting purposes.

Transport Coordinator

• **M**anaged a fleet of 150 drivers, serving as the main point of contact for both drivers and clients.
• **I** was responsible for optimizing nationwide transportation operations, significantly improving efficiency, customer satisfaction, fleet utilization, and various KPI metrics through detailed data analysis and strategic decision-making.

Fleet Management, Manheim Vehicle Services   **09.2020 – 05.2022**

• **M**anaged the fleet of demonstration and event vehicles for Jaguar & Land Rover.
• **D**eveloped and implemented a comprehensive process for preparing vehicles for high-profile events, such as Wimbledon and prestigious horse racing events.
• **L**ed a team executing the rapid vehicle transformation process, ensuring smooth efficiency and coordination among multiple staff members.
• **A**dditionally, I analysed data from electronic systems used to track vehicles and keys, which enabled the optimization of fleet operations.

EDUCATION

Manchester Metropolitan University, BA(HONS)   **2015 - 2018**

Bachelors in International Business Management

Manchester Metropolitan University, Masters   **2015 - 2018**

Masters in Data Analysis

ABOUT ME

My career journey has provided me with diverse experiences across various fields, equipping me with invaluable skills that are transferable to any setting. Through this journey, I discovered my passion for Web Development and Data Analysis, which I am eager to pursue as a long-term career. In addition to my full-time work commitments, I have continuously undertaken courses to enhance my proficiency with the latest technologies and stay updated in the ever-evolving world of web development. My expertise includes hands-on experience with React 18, focusing on performance optimizations, React Router, Context API, Redux Toolkit, React Query, Redux, Thunks, Tailwind, Supabase, and numerous other tools and frameworks. I prioritize the clarity and maintainability of my code, which is evident in my GitHub repository. Here, you can explore various projects I have contributed to, showcasing my commitment to quality and innovation in web development.
